Schaerer Coffee Soul

Easy Access: intuitive operating comfort for everyone.

The Schaerer Coffee Soul 10 and 12 with Easy Access make coffee enjoyment more accessible for everyone. The display is conveniently operated from the drip tray. Operation is comfortable and ergonomic at a lower height. In self-service areas, Easy Access also allows wheelchair users convenient access.

Advantages at a glance:

- Intuitive operation via the drip tray, ergonomic and easy to understand
- Wheelchair-friendly access to all key functions
- Easy to retrofit

Easy Access in the drip tray directly controls the display and simplifies everyday operation.

In everyday life, I rely heavily on accessibility, whether at train stations, in stores, or in buildings. That's why it's such a big advantage for me to be able to operate a coffee machine independently. Easy Access is a real game changer for people with severe paralysis. This technology is an important step toward inclusion, and I hope it also inspires other companies to consistently consider accessibility.
