

# WORRIES DOWN. **ADDED VALUES UP.**

## SYSTEM CLEANING WITH SCHAERER PROCARE.

The **Schaerer ProCare** autonomous system cleaning concept is a gamechanger in terms of hygiene, convenience and economic efficiency. The innovative system requires no interaction, so that operating errors are ruled out and cleaning can be carried out efficiently even outside opening hours. Enjoy!

**PATENTED**

## HOW PROCARE WORKS.

ProCare uses a two-component system (patented) that works with two types of cleaning agent: **acidic (RED)** and **alkaline (BLUE)** – each supplied in separate powder bags. Each bag contains 600g cleaning agent in powder which dissolves into 6l of cleaning solution – and offers up to 100 cleaning cycles, programmable in time.

\*From the last centimeter of the milk hose to the junction of the cleaning agent

### TWO-STAGE CLEANING PROCESS:

#### 1. SYSTEM CLEANING

Cycle: Daily  
How: Autonomous  
What: All systems

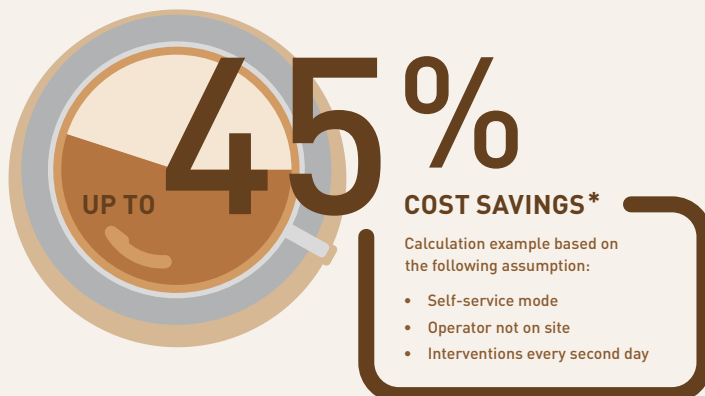

#### 2. MILK REFILLING

Cycle: On demand  
How: Plug and clean  
What: Last mile rinsing\*

## WORRIES DOWN. SAVINGS UP.

ProCare saves – in many respects. Above all, the savings in effort and costs incurred by less service, maintenance and downtime, so that the system typically breaks even after just a few months of operation. ProCare is also exemplary in terms of environmental and climate protection.

- **Fast amortisation due to reduced costs for operation, service and maintenance (up to 45%)\***
- **Low water consumption and small CO<sub>2</sub> footprint due to less physical interaction needed**

\*The cost savings vary per application, as they are influenced by various factors. We would be happy to calculate your individual savings potential for you.

## WORRIES DOWN. HYGIENE UP.

Process safety is key to set hygiene standards high. Thanks to automatic dosing, nothing can go wrong with ProCare, even in case of frequently changing staff. In addition, the proper cleaning will avoid complications and minimize downtime.

- **Use of correct cleaning agent and dosage ensured**
- **Minimal out of order time due to correct cleaning**

**-15 min**  
Daily  
downtime

**Up to -50 %**  
Operator  
interventions

**-1**  
Yearly unplanned  
intervention

## WORRIES DOWN. CONVENIENCE UP.

ProCare makes daily system cleaning convenient: The cleaning program can be set automatically, even outside operating hours, and runs for up to 100 autonomous system cleaning cycles.
